ultimate ORNAMENTS MEGA PACK

version 1.0

Clipart deSIGN is very pleased to present the most powerful collection of design elements, ornamental art, scroll designs, flourishes, frames and panels ever!

We believe that this package is a must have for every designer, sign maker and creative professional. Read below to find out why:

:: Quantity - Talk about numbers! This package has been created with a very generous attitude. The "good measure, pressed down, shaken together, running over" mentality is what stands behind our creative efforts. The result: 12,800 high quality vector images ready for professional use.

:: Quality - Despite the huge number of images, there is never a compromise in the quality standards Clipart deSIGN is famous for. You will be amazed at the vector perfection these images possess.

:: Diversity - We made sure our customers will have an abundance of styles and categories to choose from. There are 58 creative categories in this package and even more visual styles to choose from.

:: Usefulness - We have provided not only ready to go designs, but a considerable number of design elements that will enable you to create your own custom designs. Discover the power of these creative tools now!

:: Professional - Why do we call our art professional? Check out the properties of our images to find out why:

> ::: Vinyl Ready - Our images are intentionally prepared for vinyl cutting. This means closed paths, no overlaps, no crossed lines, no intersecting objects. Perfect for signage and vehicle decoration.
>
> ::: Optimized - We made sure to optimize and reduce the point numbers of our vectors - this way they will cut faster and smoother and if used in flash they will have a much smaller size than usual.
>
> ::: Exquisite - The perfection of detail in each line is what we pay special attention to. We believe our images are the most exquisite and perfected vectors you have ever seen.
>
> ::: Clean - You will enjoy clean details and easy to edit images.
